

SPARE PARTS AND O RING IDENTIFICATION CHART

The 'O' rings are actual size.

NOTE: When referring to this document for O ring sizing it must be printed to 100% scale so not to misinterpret the varied O-rings sizes.

These kits are produced using Nitrox compatible materials and may be used when servicing or converting regulators for Nitrox use.

* AP1406 Filter is not oxygen compatible. If the regulator is being converted for Oxygen use, then AP1472 Conical Filter should be used instead.
